INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Translation

(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference BR3493/JCM/FM	FOR FURTHER ACTI	ION	See Form PCT/IPEA/416
International application No. PCT/FR2003/001916	International filing date (a 23 juin 2003 (23	•	Priority date (day/month/year) 25 juin 2002 (25.06.2002)
International Patent Classification (IPC) or national classification and IPC C22C 21/02, F02F 1/00			
Applicant ALUMINIUM PECHINEY			
 This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 			
•	This report is also accompanied by ANNEXES, comprising: a (sent to the applicant and to the International Bureau) a total of sheets, as follows:		
sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).			
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.			
b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) , containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).			
4. This report contains indications relating to the following items:			
	Box No. II Priority Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability		
Box No. IV Lack of unity of invention			
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement			
I			
Box No. VII Certain defects in the international application			
Box No. VIII Certain observations on the international application			
Date of submission of the demand]	Date of completion	of this report
29 décembre 2003 (29.12.2003)		20 December 2004 (20.12.2004)	
Name and mailing address of the IPEA/EP		Authorized officer	
Facsimile No.		Telephone No.

INTERNATIONAL PRELIT ARY EXAMINATION REPORT

International	application No.
PCT, R	03/01916

V.	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
	citations and explanations supporting such statement

Statement		·	
Novelty (N)	Claims	1-13	YES
	Claims		NO
Inventive step (IS)	Claims	1-13	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-13	YES
	Claims		NO

2. Citations and explanations

Reference is made to the following document:

D1: FR-A-2690927

In the following table, the composition of the moulded part claimed in claim 1 is compared with the composition described in document D1, which is considered the closest prior art:

ELEMENT	CLAIM 1/APP.	CLAIM 1/D1
Si	5-11	4-23
Fe	<0.6	
Mg	0.15-0.6	0.1-1*
Cu	0.3-1.5	0.3-4.5*
Ti	0.05-0.25	0.1-0.2
Zr	0.05-0.25	0.1-0.2
Mn	<0.4	
Zn	<0.3	
Ni	<0.4	0.2-3*
Other	<0.1	
V	-	0.2-0.4

^{*}one or more elements selected therefrom

INTERNATIONAL PRELICARY EXAMINATION REPORT

al application No. PCT, R 03/01916

The claimed composition is considered to be specific as compared with that of the prior art, and is therefore a patentable selection relative to D1. Moreover, D1 discloses an alloy with a composition including 0.2-0.4 of V. Document D1 does not suggest that this narrow composition range improves mechanical resistance and creep endurance in the parts moulded from an AlSiCuMg-type alloy in a temperature range of 250-300°C, without loss of ductility. Claim 1, as well as claims 2-13 relating to preferred features, therefore meet the requirements of novelty and inventive step, as well as of industrial applicability for the manufacture of moulded part such as engine cylinder heads and crankcases (PCT Article 33(2)-(4)).
